Vabimo vas k ogledu razstave, posvečene sobivanju nog in obuval, njihovim spremenljivim oblikam in pomenom v prostoru in času ter njihovi vlogi pri organiziranju posameznikovega lastnega sveta. Razstavna pripoved odstira mnoge vidike obuval, ki so onkraj njihove materialne oblike, in mnoga vprašanja, ki presegajo navidezno samoumevnost naše vsakdanje izbire in rabe.

Kako opazujem svoje in kako tuje noge? Kaj pa obuvala – kako jih opazujem, izbiram in rabim? Jih izkušam od zunaj ali od znotraj? Zakaj nekatera obuvala zavržem, druga pa ohranim?

So moji čevlji res zgolj oblačilo mojih nog, kot se zdi na prvi pogled?

You are invited to attend an exhibition dedicated to the coexistence of feet and footwear, their variable shapes and meanings over geographical and temporal dimensions, and their roles in the organization of individual micro worlds. The exhibition narrative reveals many aspects of footwear beyond its material form and a number of issues that transcend the seeming self-evident nature of our daily choices and uses.

How do I observe my feet and how do I regard those of other people? And the footwear – how do I perceive it, select it, and make use of it? Do I experience it from the outside or from the inside? Why do I discard some shoes and keep others?

Are my shoes truly just a piece of garment on my feet, as they seem at first glance?
